THE WORLD

must eat. Men, women and children in Europe are already starving. If these people are to be fed and we ourselves not go hungry, while at war, America must produce a large part of the

FOOD

for them as well as for ourselves. Modern times have never seen such a

SHORTAGE

of food thruout the world as there is today. The only way to assure an adequate food supply is for the United States to

INCREASE

greatly its food output. The farmers can best show their patriotism by doing all they possibly can to raise more food. There need be no fear of over

PRODUCTION

All the nations now at war will be short of food for at least a year even tho peace should come tomorrow. To increase production the farmer must have more help. Dean Davenport, of the University of Illinois, College of Agriculture, has suggested a plan to help

SUPPLY

this need. This plan has been endorsed by the National Council of Defense and will likely be enacted into law by Congress within a short time. This will assure

FARM LABOR

to harvest the crops. A circular giving details and a summary of the St. Louis Conference, called by the Secretary of Agriculture, will be sent upon request. Other circulars and material regarding food production will be published or furnished the press. Watch the papers or write
